- Digital Financial Services: bKash & Nagad

PROFESSIONAL EXPERIENCE

SOCIETY FOR SOCIAL SERVICE (SSS)

Assistant Program Manager (IT) / Maintenance Engineer (ICT) | 12 November 2012 – Present

Area of Expertise: IT Operations, System Administration, ERP & Financial Systems

KEY RESPONSIBILITIES & ACHIEVEMENTS

- Monitor and report branch-level Microfin360 ERP operations and support software-based field operations.
- Manage PKSF OLRS, MF-CIB, MRA SIB and PKSF Cluster Data; conduct member verification, validation and regulatory data activities.
- Prepare MRA financial database and regulatory reports, along with customized MIS and management reports.
- Plan, maintain and support IT infrastructure and network operations across branch offices.
- Lead hardware management, procurement support, troubleshooting, network security and surveillance systems.
- Implement cybersecurity measures, IT security practices and data protection protocols.
- Manage Mobile Financial Service operations involving bKash and Nagad; monitor mobile recharge distribution and app-based collection.
- Lead IT strategy planning and implementation; formulate IT policies, security policies and operational guidelines.
- Manage IT budget planning, budget control, software licensing, upgrades and system updates.
- Lead and supervise a 25-member IT support team supporting 862 branch offices nationwide.
- Deliver staff training and development programs and conduct internal and external IT examinations.
- Provide organization-wide IT support, technical troubleshooting, peripheral servicing and website maintenance support.

AUTOMATION & SOFTWARE DEVELOPMENT

- n8n Workflow Automation: workflow design, automation concepts and integration-oriented development.
- Make.com Automation: workflow automation, process design and integration concepts.
- MERN Stack Development: learning and practical development through Ostad platform.
- Frontend Development: HTML5, CSS3 and JavaScript.
- Programming & Backend Development: Python and Django.
